

## Aurasma Guide

The field of Augmented Reality is the wave of the future. I plan on introducing OLA to this ever expanding field now so that all of us can be on the front line of this technology revolution! So how do you get started?

*For Apple & Android User*

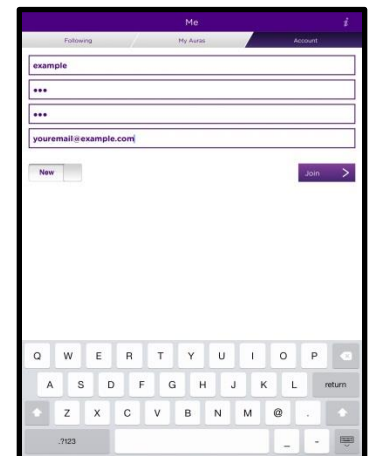

**Step 1:** Enter the App Store in your mobile device and search for the app “Aurasma”

**Step 2:** Once the app has been fully downloaded, open the app.  
This is the icon:

**Step 3:** Upon entering the app, you will have to sign up and begin your own Aurasma account (*it is completely free of charge*). Please fill this in using correct information and a **username & password you will remember**.

**Step 4:** Once you have signed up, go to the magnifying glass at the bottom of your screen. Pull up the search box, and type in: MrScottHebert.

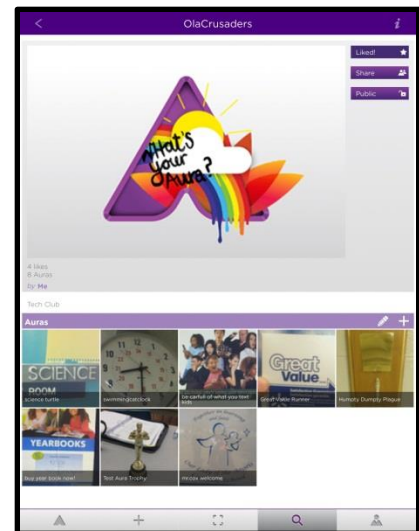

Click the tab that says Channels and look for the channel labelled “MrScottHebert” and click on it.

**Step 5:** On the top left corner of your screen, it will have three purple bars. The top one will say ‘Like.’ The middle one will say ‘Share,’ and the bottom one will say ‘Public.’ Click the top one that says ‘Like.’ When you “Like” this, or any other channel, you will gain access to the content created by that user.

*It is similar to Twitter or Instagram based on the concept of “following” someone.*

Whenever I post a new aura, you can find it somewhere in the school, and see how it comes **alive!**

**\*Hint\*** You can look for clues as to where the new Auras are located at the bottom here...
